

Registered Certified Backflow Device Testers

All backflow prevention assemblies installed at commercial facilities must be tested annually. This testing must be performed by a Plumbing or Mechanical Contractor who is certified by the State Plumbing Board and who has had their test gauge certified within the current calendar year. **We require that all device test results be submitted using our web-portal as we no longer accept device forms by email, mail, or fax.**

Below is a current list of companies (as of 4/01/2016) that have met our requirements and are registered with the CC Department to test and electronically submit test data for devices in the City of Grandville. This list is provided as a courtesy and is not intended as an endorsement; the businesses listed below have no affiliation with the City of Grandville. It is the responsibility of the facility owner to hire a contractor and pay for any services rendered. It is recommended to call more than one contractor for price quotes and comparisons before making a selection.
